

# Simplify 3<sup>rd</sup> party patch management with SCCM & EminentWare

EminentWare WSUS Extension Pack  
EminentWare 3<sup>rd</sup> Party Updates Pack

Automatically receive “SCCM Ready” 3<sup>rd</sup> Party Patches – pre-researched, created, tested, and ready to deploy.

If your company is using Microsoft’s System Center Configuration Manager (SCCM) for update management, your IT team is most likely faced with the expensive and time-consuming challenge of updating and maintaining 3<sup>rd</sup> party patches for common applications such as Adobe, Mozilla, and Sun. With EminentWare, you can reduce or even eliminate the many hours (or even days) required to manually research, create, test, and implement 3<sup>rd</sup> party patches via SCCM.

Software Updates

Software updates allows administrators to assess software update compliance and provides tools to generate and track software update deployments.

Software Update Compliance Status Summary - Last Updated: 4/12/2010 3:36 PM

Display software update compliance for a specific vendor, update classification, and release date.

Vendor: Adobe Update classification: Security Updates

Month and year: December, 2009

*EminentWare provides “SCCM Ready” 3<sup>rd</sup> Party Patches that can be easily deployed using SCCM. Shown above, Adobe Flash & Adobe Reader.*

EminentWare provides a continually updated catalog of 3<sup>rd</sup> party “SCCM-ready” patches that can be synchronized and deployed with SCCM on your schedule. In addition, EminentWare provides time-saving management features that enhance SCCM functionality such as enterprise-wide maintenance and repair of the Windows Update Agent and WMI. See for yourself how EminentWare complements SCCM to help you keep desktops, laptops, and servers patched, secure, and running smoothly while also saving time, eliminating headaches, and reducing costs.

## SIMPLIFIED 3<sup>RD</sup> PARTY PATCH MANAGEMENT

Automatically receive pre-researched, created, and tested “SCCM ready” 3<sup>rd</sup> Party update packages that can be imported, deployed, and managed via SCCM on your schedule, saving hours of implementation time and helping to ensure timely patch management procedures.

Receive automatic email and “Outlook-style” alerts when patches become available and also when catalogs are synchronized. Receive metrics of security and critical levels. Customize your notification list so that relevant IT staff is notified.

Receive packages for the most popular vendors including Adobe, Mozilla, Sun, WinZip, Apple, HP, Dell, & more.

Choose the 3<sup>rd</sup> party patches your company needs and exclude those that are not needed – simplifying the patch management & selection process. Also add links to other vendors’ catalogs or your own company’s catalogs.

Automatically synchronize the EminentWare 3<sup>rd</sup> Party Updates Catalog and other catalogs with SCCM on a schedule that is convenient for your organization.

## ADVANCED UPDATE MANAGEMENT

Create advanced package deployment scenarios with PackageBoot™ Technology.

With PackageBoot you can:

- Stop and start services
- Bundle multiple MSI, MSP, or EXE files in a package
- Run uninstalls or custom scripts
- Dynamically detect applications that have required update files locked and in-use and stop them.

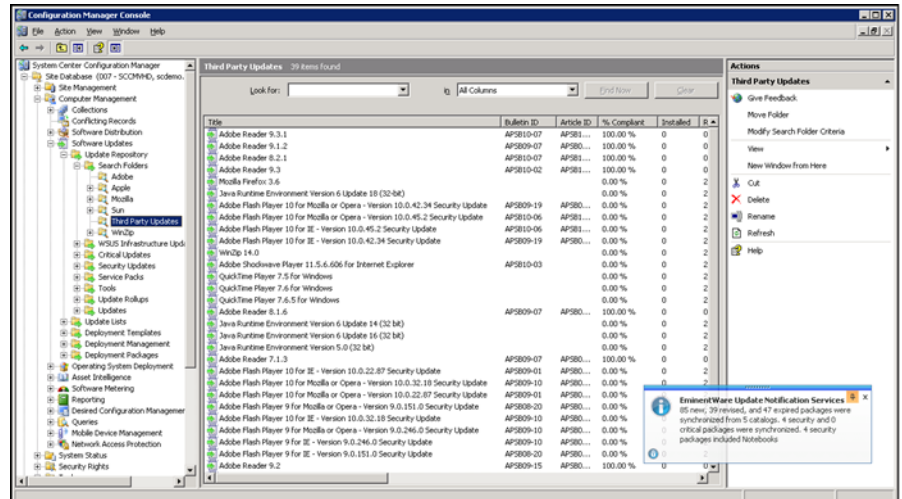

## ENHANCED CLIENT DIAGNOSIS AND REPAIR

Enhanced Client Health Reports make it easier for you to diagnose and fix client issues.

## Enterprise-wide Windows Update Agent

**Maintenance & Repair:** Quickly analyze the current status, diagnose, and fix the Windows Update Agent on any machine or server in your environment. Run enterprise-wide reports to quickly determine the current status of all Windows Update Agents throughout your environment.

**Enterprise-wide WMI Repair** allows you to quickly and easily see and diagnose the current state of the WMI service and configuration on computers enterprise-wide. Quickly diagnose and fix WMI on one to thousands of machines across your environment from a central point of control.

Receive "Outlook Style" alerts when new 3<sup>rd</sup> party patches are released.

## ENHANCED REPORTING

Easily create and distribute patch status and patch management reports -- no SQL expertise required. Use built-in reports or easily create your own with EminentWare's powerful ad hoc reporting functionality.

## ENHANCED ENTERPRISE DISCOVERY

Enable enhanced enterprise discovery allowing you to easily discover machines that may be hiding in your environment -- including rogue, unauthorized, or improperly configured machines, devices & workgroups -- without dependencies on Active Directory and SNMP.

## 3<sup>rd</sup> Party Applications Supported

Below is a SAMPLE LIST of the "SCCM Ready" 3<sup>rd</sup> party applications that are currently supported by the **EminentWare 3<sup>rd</sup> Party Updates Pack**. For a full list of all applications and versions supported by EminentWare 3<sup>rd</sup> Party Updates Pack, please visit: [www.eminentware.com](http://www.eminentware.com)
